MESSAGE FROM THE CHAIRMAN

We take the pleasure in introducing ourselves as one of the leading companies specialized in electro mechanical works in the Middle East.

Projects, concluded till present time, cover water-sewage pumping stations, pipelines, fuel and fire pumping stations with all networks as well as infra-structure for newly developed satellite cities.

These projects are only part of the overall range available from our company.

We take pride in our quality workmanship, service and experience backed by agreements with many international suppliers for all electro mechanical materials and equipment to cover all our customers' requirements.

To put it simply, there are no limits to the scope of our activities.

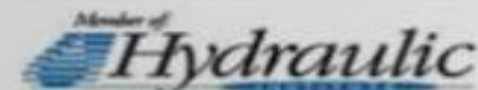

Last but not least I extend my thanks to all our previous and current clients for fully cooperation with our Headquarter and Branches to execute our scope.

ENG BAHAA EL DIN HUSSEIN
Chairman Bahadri Group

Best regard

Bahaa El Din Hussein

AURORA PUMPS Fire Pump System: Consisting Of (Electric-Diesel-Jockey) Model 900.

Horizontal Split Case Electric Drive
Fire Pump - Series 912
KEY FEATURES

UL Listed/FM Approved/NFPA-20 Design
For Commercial, Industrial and Marine Use
Diesel and Electric Driven Available
Lower Initial Cost
Quicker Delivery with Red Hot Quick Ship Program
Easy of Maintenance

Horizontal Split Case Diesel
Drive Fire Pump - Series 913
